

# About Us

## **WE ARE THE ELECTRICAL-CABINET SPECIALISTS, FROM DESIGN TO CONSTRUCTION AND INSTALLATION**

BIANCHI QUADRI Srl specialises in wiring electrical cabinets and in field wiring for all kinds of machines. Whatever your automation or electrical-design needs may be, with Bianchi Quadri you can count on a team of experts ready to tackle even the toughest challenge.

From our base in Castiglione Olona in Lombardy, we design and build electrical cabinets of all types and sizes using the most advanced professional tools and machinery.

Our approach is a winning combination of the latest-generation technology, including 3D-design systems, with a young team of can-do professionals. We don't just sell you a product – we are partners that your business can rely on to solve your problems and fulfil your requirements in a true spirit of collaboration, professionalism and customer care.

## **DESIGNING ELECTRICAL CABINETS: A POWERFUL COMBINATION OF EXPERIENCE AND INNOVATION**

We have over two decades of experience in building electrical cabinets for all kinds of application, from plastic extrusion and metalworking to air and water treatments.

We produce high-quality products in an extremely innovative approach from concept through to execution, with a keen eye for optimum efficiency and visual appeal. Our user-friendly systems are easy and intuitive to operate from the word go, which makes for a safe and highly practical installation.
