

Services

Design

We design our electrical cabinets using the most advanced technical-drawing tools, from EPLAN P8 and AUTOCAD to INVENTOR...

[Read more](#)

Software

To meet a customer's needs, installations must be personalised, which is why we also offer a dedicated software-development service...

[Read more](#)

Electrical Cabinets

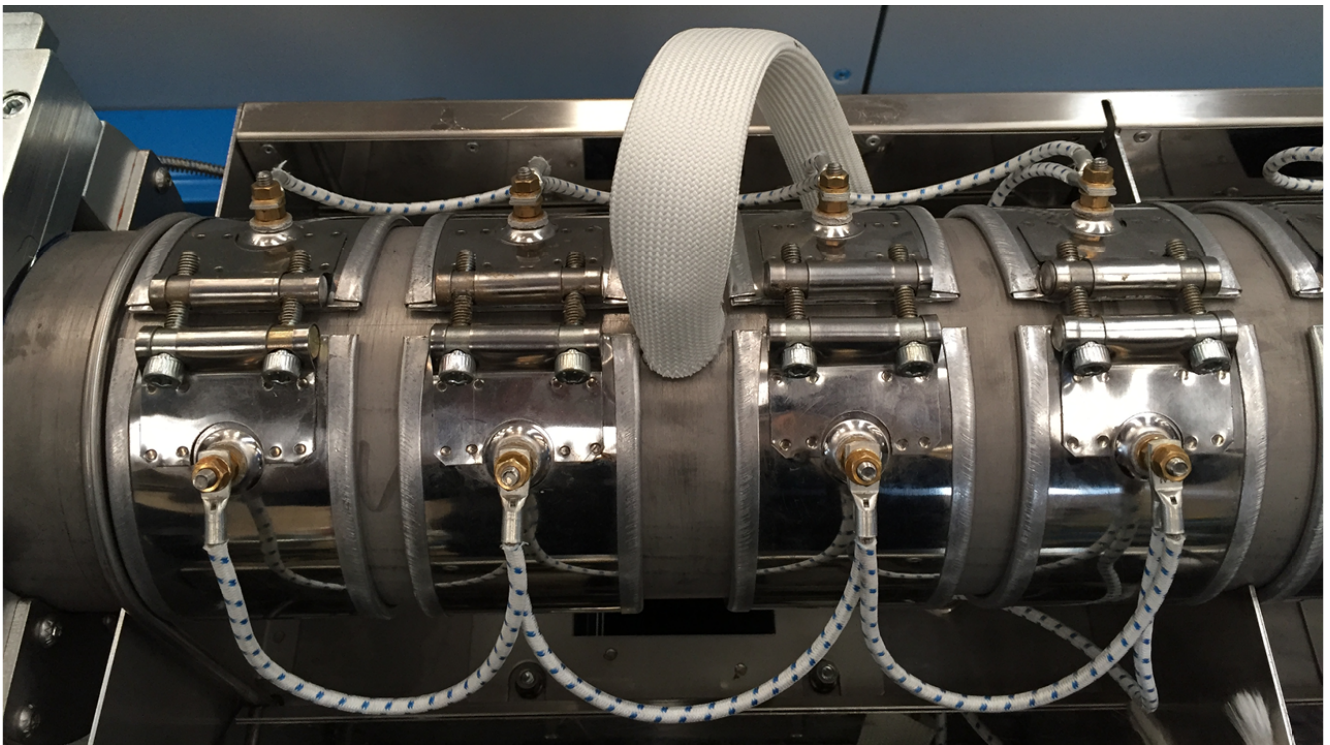

Our electrical cabinets for automation and distribution applications are made exclusively by trained, experienced technicians...

[Read more](#)

Certifications

We subject all our electrical cabinets to a comprehensive battery of functional tests to ensure that they are all handed over in perfect working order...

[Read more](#)

Field Wiring

We create field wiring for systems of various types and levels of complexity, choosing the devices, cables, distances and finishes involved with meticulous care...

[Read more](#)

Installation

We install the equipment and get it up and running, providing all the necessary technical and after-sales support in Italy and abroad...
